

Memorandum of Understanding

between

Carleton Sustainable Energy Research Centre (CSERC)

Carleton University, Ottawa, Canada

And

Energy And Environment Foundation (EEF)

New Delhi, India

For global cooperation in the area of Renewable Energy Resources

Signed during

World Renewable Energy Technology Congress-2011

on April 22, 2011

at New Delhi, India

The Carleton Sustainable Energy Research Centre (CSERC), Carleton University, Ottawa, Canada was established in 2009 as part of a major strategic initiative by Carleton University of develop research and teaching programs in the area of sustainable energy.

Energy And Environment Foundation, New Delhi, India has been constituted in 2010 to serve as a catalyst to address global energy and environment issues for a healthier, happier, prosperous and greener planet.

Need for global cooperation

- India and Canada have abundant, untapped renewable energy resources.
- To develop Sustainable and Renewable Energy solutions
- To explore emerging and affordable renewable energy sources such as wind, solar and biofuels, while looking at strategies for using traditional and non-renewable energy sources more effectively and responsibly.
- Renewable Energy can provide a buffer against energy security concerns.

Through global cooperation by sharing technologies, education, teaching and organizing conferences without any financial commitment – create valued added and efficient greener renewable energy sector in Canada and India
