

Agreement of Cooperation

between

Centennial Energy Institute

School of Engineering Technology & Applied Science

Centennial College, Toronto, Canada

And

Energy And Environment Foundation (EEF)

New Delhi, India

In the area of Renewable Energy Technologies

Signed during

World Renewable Energy Technology Congress-2011

on April 22, 2011

at New Delhi, India

School of Engineering Technology & Applied Science, Centennial College, Toronto, Canada is a leader in the development of research and training programs in the area of conventional and renewable energy technologies.

Energy And Environment Foundation, New Delhi, India has been constituted in 2010 to serve as a catalyst to address global energy and environment issues for a healthier, happier, prosperous and greener planet.

The context for cooperation:

- India and Canada have abundant, untapped renewable energy resources.
- To develop Sustainable and Renewable Energy solutions.
- To explore emerging and affordable renewable energy sources such as wind, solar and biofuels, while looking at strategies for using traditional and non-renewable energy sources more effectively and responsibly.
- Renewable Energy can provide a buffer against energy security concerns.
